◎ My Goal

Hello, my name is Gatman Serghei. I'm a front-end developer. My goal is to become a full-stack developer. Writing code for me is the ability to create something, using tools that are not accessible in the understanding for simple computer users and Internet users. IT area attracts me by the fact that you need to constantly learn and develop. You can compare IT with the universe, the more we learn, the more we understand how small our knowledge is.
